FOR IMMEDIATE RELEASE:

Elspec Announces the G3500 BLACKBOX Portable Power Quality Analyzer

Company launches a new Portable Power Quality Analyzer to remain competitive in the Power Meter market while providing superior functionality.

Caesaria, Israel; April 11, 2010 – Elspec Ltd. today announced a new Portable Power Quality Analyzer; The **G3500 BLACKBOX Portable** with all of the most desired features of a Portable Power Quality Analyzer but at a price that is designed to remain competitive in the Power Meter market.

For this exciting introduction, BLACKBOX Product Manager Asaf Laifer explains, "Elspec's experience and success in the market led us to the conclusion that a more economic solution, based on the innovative approach of the original BLACKBOX, is needed for medium to small scale commercial and industrial customers, as well as, power quality consultants. After thorough market research and development, we proudly announce the new G3500 portable power quality analyzer that matches the requirements of the aforementioned market in both features and price. As BLACKBOX product manager, I remain committed to continuously seeking and listening to the needs of our customers, then focusing our efforts to meet or exceed those needs."

Elspec, develops, manufactures, and markets Power Quality Solutions that are sold worldwide through a network of authorized Agents. The company has been producing leading edge Power Quality Solution products since 1993. In 2006, the company introduced a new line of Power Quality Analyzers coined the BLACKBOX. The BLACKBOX is a state of the art Power Quality Analyzer that utilizes a patented PQZip technology that allows continuous recording of all parameters all the time without the need for Triggers or Thresholds.

Now, its latest introduction, the **G3500 BLACKBOX Portable**, built on the same innovative technology as the BLACKBOX Fixed Power Quality Analyzer, the Elspec G3500 BLACKBOX Portable, with its continuous onboard waveform logging, is a proud addition to the distinguished BLACKBOX family of the most advanced power quality meters on the market. The G3500 BLACKBOX has the power to determine the root cause of all Power Quality (PQ) issues,
